OFFICE SUPPLIES

The importance of a healthy workplace and a clean environment drives Seating Inc.'s commitment to sustainable manufacturing. Their products are BIFMA Level® certified to conform to the ANSI/BIFMA e3-2014 Furniture Sustainability Standard. Additionally, Seating Inc. products may help projects qualify for LEED points.

16 different task, lounge, and specialty ergonomic chairs are manufactured in Seating Inc.'s New York Factory.

W. B. Mason aims to reduce carbon footprint and increase sustainability by encouraging all businesses and customers to advocate for social and environmental responsibility. The company participates in a "go green" initiative which utilizes environmentally-friendly products.

Popular sustainable products include recycled paper, sticky notes, and binders.

W. B. Mason offers 61 recycled copy and multi-purpose paper items from 11 brands. Finch Paper, an upstate New York paper manufacturer, is one of these. Their Fine Color Copy can be used for both office and digital production printing and features FSC® certification and 10% post-consumer recycled fiber to meet today's corporate requirements.

By integrating sustainable forestry practices, green power generation, and elemental chlorine-free pulp and paper production, Finch is a leader in high-quality, environmentally responsible paper markets.

“ Why choose Sustainable Seating: Sitting better means living better. Seating your workers and clients in custom configured, skillfully crafted ergonomic chairs proves that you value their comfort and health. And buying locally, from a certified green manufacturer, means making a difference in your community and beyond!

- Judy Hart, President, Seating Inc.,
Level® certified sustainable Western New York manufacturer”

FOOD

McCullagh brings businesses Ecoverde Coffee, an economically, environmentally, and socially sustainable choice!

Ecoverde Coffees are 100% sourced from Rainforest Alliance Certified™ coffee plantations and packaged in industry leading compostable film. The result is a deliciously smooth, socially responsible, and environmentally friendly cup of coffee businesses can feel good about. Ecoverde currently comes in variations of dark roast, medium roast, and decaffeinated.

Headwater Food Hub is upstate New York's award winning Food Hub focused on local, farm fresh food and/or produce.

Headwater connects local farms with businesses and organizations by providing the infrastructure, supply chain logistics and innovation required to deliver consistently fresh, local, and great-tasting fruits, vegetables, cheeses, meats and more while cultivating a sustainable food system.

Their mission is to develop, in partnership with farmers and community & regional needs, a socially and environmentally responsible, top quality food distribution company and Community Supported Agriculture (CSA) program. Deliveries available in Greater Rochester, Greater Finger Lakes, and Greater New York City areas.

ENERGY/ LIGHTING

The Grainger Energy Services team can identify and implement a wide range of energy- and water-efficient solutions for businesses through its network of insured and licensed service providers. These providers can also help businesses secure applicable incentives and rebates for energy- and water-saving projects.

Grainger Lighting Services (GLS) delivers an energy-efficient lighting solution and benefits businesses by reducing operating costs, upgrading infrastructure, lowering operational risk, reducing the facility's carbon footprint, and more.

Some of Grainger's Green Resources include: Energy Management, Water Conservation, Waste Reduction, Improve Indoor Air Quality.

JANITORIAL/ SANITATION

71% of consumers are concerned about sustainability of products they use. Johnston provides and distributes items including: paper towels, tissues, housekeeping/janitorial, dietary paper products, and more. Popular sustainable products include the compostable Harvest Fiber Collection, Sabert Green Collection, and Greenware containers.

Kimberly-Clark is the first major towel & tissue manufacturer in North America to introduce products made with 20% plant fiber. The company's GreenHarvest products incorporate plant-based renewable fibers into trusted Kleenex® and Scott® Brand towel and tissue products, providing a truly innovative offering. Currently, Kimberly-Clark sources 100% of wood fiber from third-party certified suppliers.
