

The HUGS Foundation provides free surgery to children and adults suffering from congenital facial deformities. Our goal is to help transform lives and restore confidence so that each child can live a productive, fulfilling life. The surgeries we perform enhance a child's appearance and function- and so much more. HUGS affords children intangible opportunities for a more normal life that otherwise would be beyond their grasp.

**How can you help give smiles? We welcome in kind donations of supplies.
If you have access to samples, over runs or too much product, please call us today at 585.244.1000.**
